Future NOGA branches planned

Vessel Traffic System (VTS) Navigation Tower — Sokhna Port

The Challenge

A greenfield, highly technical maritime navigation project with no existing specifications or in-house technical expertise to build from.

Approach

Mapped technical and operational risks and built a standard standard reference model.

Formed a cost-neutral partnership with the Suez Canal Authority.

Co-developed tender documents aligned with international maritime standards.

Results & Impact

Contract awarded below comparable market rates with latest technology.

Procurement, installation, and commissioning delivered in 7–8 months.

Improved maritime safety, throughput, and real-time tracking.

Enterprise Inventory Control & Strategic Planning — SCZONE

Scope & Approach

Full ownership of inventory planning, reorder thresholds, and asset control across multiple ports and ports and economic hubs.

Set dynamic Min/Max reorder points to prevent stockouts and release working capital.

Catalogued, photographed, and condition-assessed telecom and IT equipment.

Ran multi-year trend analysis to guide smarter resource allocation.

Why It Matters

Audit-ready

Governed inventory data across every site

Data-led

Stronger budgeting and feasibility decisions

Scalable

A repeatable control discipline for growth

Warehouse & Custody System Automation

The Challenge

Records were tracked manually on paper and scattered Excel scattered Excel files. Finding a custody record or processing a processing a return required slow, file-by-file searches. searches.

Solution

Built an integrated system with Excel Power Query, Power Power BI, and Access.

Designed instant search by employee name.

Structured custody tracking and returns processing as core functions.

Impact

Daily use by staff responsible for custody and returns.

Replaced manual searching with instant name-based lookup. lookup.

Delivered independently without an external integrator.

A practical digital transformation that converted fragmented records into a usable, structured operational system.

Warehouse Regulations Framework

The Challenge

SCZONE had no formal warehouse regulations. Inventory and custody procedures relied on informal practice rather than a documented governance framework.

Approach

Benchmarked Ministry of Communications, FRA, West Delta Electricity, and government warehouse regulations.

Drafted a tailored framework using AI-assisted research and drafting.

Governance Outcome

A standardized, documented warehouse governance framework for SCZONE.

Designed entirely through individual initiative, without external consultancy.

Currently progressing through legal review ahead of formal approval.

**From informal practice to governed process.
process.**

Procurement & Contracts Regulations

The Challenge

As Section Head, led a five-person team to build SCZONE's unified procurement and contracts regulations framework.

Method

Assigned each member a reference company to analyze.

Consolidated findings in a joint working session.

Co-authored the first unified draft as a team.

Results & Impact

Regulations formally approved and still in effect at SCZONE.

Created one consistent reference for procurement decisions.

Built consensus-building and drafting capability across the team.

One framework.

One consistent standard for procurement decisions.

NOGA Café — Business Feasibility & Digital Transformation

The Challenge

Developing a financially viable café concept in Suez that combines a distinctive customer experience, efficient operations, sustainable growth, and data-driven decisions.

Scope & Approach

Business model, operating concept, and financial feasibility framework.

CAPEX, OPEX, pricing, break-even, and scenario planning.

Procurement, inventory, and demand planning frameworks.

Digital Twin concept for expansion and multi-branch planning.

Results & Impact

Integrated commercial, operational, and financial financial business model.

Scalable operating framework for future expansion to 10 branches.

Data-driven foundation for forecasting, inventory inventory optimization, and decisions.

Capabilities & Contact
